

The Company:

G4BOX INC. is a digital media provider, specializing in the publishing and distribution of online video games. The company was founded in 2006 on the principle that online, community-based video games offer unique and compelling gaming experiences with untapped mass market potential and wide social appeal. They currently offer a growing portfolio of successful, massively multiplayer online game properties. G4BOX provides a gaming portal z8games.com which offers a wide range of online games such as Cross Fire and Metin 2. This gaming portal showcases new games, free games, and the ever popular Massive Multiplayer Online games (MMO).

The Challenge:

G4BOX approached the team at Gate2Shop requiring solutions for the z8games portal to provide a quick and uninterrupted service to their site, with payment solutions that would accommodate a global audience. Together with these services they requested customization to their payment page to provide a clean and specialized look and feel.

The Solution:

The professionals at Gate2Shop accepted this challenge as many others. First was the fully customized public payment page that in itself provides many dynamic features that allow for tracking and promotional needs. The second step was the access to 80+ localized and globalized alternative payment methods that give the end-users many different options for rendering payments. Although not all of the Gate2Shop solutions would be needed, they were still made available to supplement the needs of the G4BOX team. With all of these features, along with the customization to the payment page, the integration was fast and seamless, receiving praise upon completion.

Gate2Shop (www.g2s.com) is a premium provider of e-commerce technology for software and digital service vendors who want to market and sell their software or products online. Backed by more than a decade in the industry, Gate2Shop provides a platform that is comprehensive and secure.
